SKILLS

● **Expertise :** HTML | CSS | Bootstrap | Tailwind CSS | JavaScript | ES6 | React JS

● **Comfortable :** Node | Express | MongoDB | REST Apis | JWT | Stipe

● **Familiar:** Next JS | Redux | Typescript | MySQL

● **Tools :** ChatGPT | Figma | Git | VS Code | Vercel | Netlify | Canva

● **Soft Skills:** Team player | Bias for action | Quick learner | Problem solving

PROJECTS

1. Artshala (MERN-stack project)   **Live link | Github > Client | Server**

Artshala is an online art school that provides students with an immersive learning experience during their summer vacations.

The key features of Artshala are -

- Provides separate dashboards for students, instructors, and administrators to manage their tasks.
- Integrates various payment methods with Stripe and a secure authentication system.
- Enables instructors to create, and manage classes and offers an admin panel with administrative controls.

Technologies: HTML, CSS, Tailwind, JavaScript, React, Node, Express, MongoDB, Stripe, JWT, etc.

2. Toyland (MERN stack project)   **Live link | Github > Client | Server**

Toyland is a kid's teddy e-commerce platform with a user-friendly interface. Where users can buy toys, if the user wants, they can also sell toys by adding toys.

The key features of Toyland are -

- Implemented features such as toy searching, shopping cart, and sorting by categories.
- Integrated Firebase authentication for providing a secure login and registration system.
- Users can add new toys, retrieve toy details, update existing toys, and delete toys from the database.

Technologies: HTML, CSS, Tailwind CSS, React JS, Node JS, Express JS, MongoDB, and Firebase

3. Chef's Magic (Front-end based project)   **Live link | Github > Client | Server**

Chef's Magic is an Italian food restaurant website. Chef's Magic has a visually appealing and user-friendly recipe catalog.

The key features of Chef's Magic are -

- Developed a dynamic interface that allows users to explore a wide range of food recipes.
- Build a robust backend by using Express, and APIs for retrieving recipe information.
- Implemented features like user authentication using Firebase, and saved favorites, enhancing the overall user experience.

Technologies: HTML, CSS, Tailwind CSS, React JS, Express JS, and Firebase
